

# Senior Solar PV Project Developer

## Milan, Italy

### Your Role

WKN Italia is looking for a Senior Solar PV Project Developer, passionate for the Renewable Energy themes, with practical knowledge of PV technology and relevant experience in conducting technical due diligence, project design, and design review of PV plants under development, with focus on the Italian Market.

The suitable candidate is a trusted Team Player with excellent organizational and communication skills, who will join our Italian Development Team based in Milan.

### Your Main Tasks

For each PV project, undertaking and monitoring all steps to successfully achieving the internal quality assurance review, and the subsequent completion of the authorization process, until reaching the Ready-To-Build status.

This activity mainly includes, among others:

- Supporting in ensuring the origination and development of a pipeline of Solar PV Projects in Italy.
- Analysis of the Italian Renewable Energy regulatory framework at national/regional/local level;
- Evaluation of preliminary feasibility studies and project teasers;
- Performing Technical Due-Diligences, including technology, land availability, cadastral assessment, constraints, grid connection and financial analysis;
- Managing relationships with external stakeholders (i.e.: co-developers, legal, technical and financial advisors);
- Managing the authorization processes and interacting with competent authorities (i.e. Terna, Ministries, Regions and Municipalities);
- Supporting the scouting activities of greenfield opportunities.

In addition, you will support the Team on the following activities:

- undertaking site inspections and reporting;
- Screening, selecting, and managing technical contractors, key component providers, BoP, O&M, or EPC contractors;
- Supporting the negotiation of Co-Development agreements and subsequent follow-up;
- Supporting business development and marketing activities;
- Interacting with the other departments of the Company (i.e. technical, legal, compliance, financial, etc.)

### Your Profile

- M.Sc. Degree in Energetic, Mechanical, Electrical or Environmental Engineering is preferred;
- M.Sc. Degree in Project Management, or in other strictly technical/scientific field may suit;
- 5/6 years previous experience in the Solar PV sector as a Project Developer, Technical Consultant, or EPC Manager is essential;
- excellent level of written and spoken Italian and English is strictly required;
- Knowledge of the Italian energy sector and regulatory framework, especially in permitting procedures is desired;
- Good knowledge of MS Windows OS and MS Office Package is required;
- Good knowledge of GIS tools, Autocad, and Google Earth is essential;
- Knowledge of PV Syst and Meteonorm is desirable.
